EDUCATION

Forman Christian College University

Bachelors (Hons.) Computer Science

3.29 CGPA

Lahore, Pakistan

Jan, 2018 - Mar, 2022

RELEVANT EXPERIENCE

Medical Guardian

Senior Frontend Engineer

Philadelphia, Pennsylvania, USA (Remote)

Nov, 2025 - Present

- **Analytics Dashboards:** Designed and shipped analytics dashboards for call metrics, device activation, and campaign performance, incorporating KPI cards, sortable data tables, and contextual tooltips to provide customer success teams with a unified view of outreach performance and issue resolution.
- **Campaign Creation:** Built the end-to-end campaign creation experience through a six-step guided workflow covering audience targeting, care gaps, communication channels, scheduling, AI agent configuration, and final review, enabling non-technical users to launch patient outreach campaigns independently.
- **Product Rebrand:** Led a company-wide product rebrand across the web application and public landing page, aligning customer-facing elements including navigation, page titles, hero content, and browser metadata in a coordinated release.
- **Responsive Design:** Made the platform fully responsive across phones, foldables, and tablets through adaptive layouts, collapsible sidebars, and mobile navigation drawers, eliminating horizontal scrolling and improving usability for field users.
- **Design System:** Established a shared design system spanning 40+ screens with consistent typography, color palettes, iconography, and reusable UI components, reducing visual inconsistencies and accelerating feature delivery.
- **Cross-Functional Collaboration:** Partnered closely with product, design, backend, and QA teams throughout development cycles, contributing pull requests, conducting code reviews, addressing feedback, and successfully shipping 25+ feature releases without disrupting the production trunk.

Frontend Engineer

UI/UX Developer *Freelance*

Worldwide (Remote)

June 2024 — Aug 2025

- **Website Development:** Designed and developed custom websites and web applications for clients, translating business requirements into responsive, user-friendly digital experiences.
- **UI/UX Design:** Created wireframes, user flows, prototypes, and high-fidelity interfaces, collaborating with stakeholders to improve usability, accessibility, and visual consistency.
- **Responsive Design:** Built mobile-first, adaptive layouts that provided seamless experiences across desktops, tablets, and mobile devices while maintaining design integrity.
- **Frontend Architecture:** Developed scalable and reusable UI components using React, Next.js, TypeScript, and modern frontend best practices, accelerating feature development and maintenance.
- **API Integration:** Integrated REST APIs and third-party services to support dynamic content, authentication workflows, analytics tracking, and interactive user experiences.
- **Performance Optimization:** Improved website speed, accessibility, and SEO through code optimization, lazy loading, image optimization, and adherence to web performance best practices.

- **FARM Stack:** Developed a comprehensive course on the FARM Stack, creating Single Page Applications using FastAPI, React, and MongoDB, complete with hands-on projects.
- **Personalized Learning Paths:** Designed and managed curated learning paths to target specific skill development, optimizing user learning experiences.
- **Unity:** Supervised the development of a Unity course focused on AR, where I built immersive environments and spaces for AR and VR tracking.
- **React Native:** Spearheaded the implementation of React Native solutions, overseeing integration of hooks, Redux, and Firebase for efficient state management and real-time data synchronization.
- **Docker:** Developed Docker files to containerize environments, enabling seamless execution of various programming languages on the platform.
- **Content Creation:** Authored 12 technical interactive blogs. on HuggingFace, TensorFlow and PyTorch.
- **Author Onboarding:** Led 15 live product demonstrations to successfully onboard and train technical authors.

PROJECT EXPERIENCE

Hello Plant! (Final Year Project)

Feb, 2021 - Feb, 2022

- Developed a flower recognition application that gave 94% accuracy for captured flowers within 5 seconds.
- Used the users' geographical location to show flowers that are suitable for growth in the users' city.
- Led a team of 3 to design a website and establish a new user interface using Visual Basic to increase the number of clients at a local business.
- Collaborated in a team of three with the responsibility of designing the front-end, integrating the back-end with the front-end, and web scrapping.
- (FCCU 2022 Best Senior Project Poster Award - Winner)

University Management System

Mar, 2020 - May, 2020

- Developed a University Portal where the system had three entities: Admin, Student, and Teacher.
- Developed several types of CRUD operations for these modules. Such as course registration, grading exams, hiring new teachers, etc.
- Website was developed in HTML Bootstrap framework, so it was cross-platform on PC as well as mobile phone screens.

SKILLS

Python	React Native	MySQL
HTML/CSS/Bootstrap	Docker	WordPress
